

Chemistry vs. Physics:

Most cleaners use chemicals to bond with the chemical properties of dirt. Activeion is based on physics and uses an electrical charge to break down dirt quicker, enabling it to be lifted off of surfaces easier.

Zap Germs Dead!

The charge added to your tap water ruptures the cell membrane of germs and bacteria. Activeion kills more than 99.9%* of most harmful bacteria (E. coli, VRE, Salmonella, MRSA, Pseudomonas, Staph, Listeria and E. coli 0157:H7) and the H1N1 virus (*when used as directed). The high temperature (311 degrees) of our vapor steamer paralyzes mold, mildew and other bacteria.

Leaves Nothing Behind

With chemical cleaners you may think that you are wiping away and removing any harmful chemicals, but the fact is, those cleaners leave behind a chemical residue that is potentially dangerous to your family. Activeion AND our Vapor Steamer leaves behind only water. And water simply evaporates.

Cleaning Homes & Businesses

Since 1993

We Clean Long Island!

The Future of Clean Is Here

WE BELIEVE WE HAVE FOUND A TRULY REVOLUTIONARY CLEANING SYSTEM THAT WILL ENABLE US TO HELP CREATE A SAFE AND SANITARY ENVIRONMENT FOR OUR CUSTOMERS.

We've Cut out the Chemicals!

With the ever increasing use of chemicals and illnesses related to the oversupply and use in our society - now more than ever can you reap the health benefits of steam cleaning while we make your home purely clean and leave nothing behind to contaminate your space.

Did you know...

Within 26 seconds after exposure to chemicals, they can be found in every organ in the body.

What is the difference between Steam and Vapor?

Temperature. Dry steam vapor is created by temperatures of at least 260 degrees internal. Our Vapor cleaners have boiler temperatures ranging from 293 - 320 degrees Fahrenheit. This will give you the highest cleaning power and pressure output. The higher the temperature, the more condensed water molecules become. Mold, mildew and bacteria cannot withstand these high temperatures.

We're Hip to HEPA!

We use Sanitaire® Commercial Canister vacuums by Electrolux

They are a CRI Green Label™ approved vacuum. That label signifies a superior cleaning vacuum that has passed testing for soil removal, dust containment and carpet appearance retention. It also has a patented TRUE HEPA filtration system that captures 99.97% of all particles down to 0.3 microns for cleaner indoor air. Even the carbon dust emitted by the motor is captured.

Be safe with the knowledge that we are not only vacuuming your carpet more efficiently, but we are also emitting only clean air back into the room.

www.teresasfamilycleaning.com

- Transforms your tap water to a powerful cleaning agent.
- Eliminates 99.9%* of harmful germs including H1N1 and E. coli. (*when used as directed)
- No chemical-related health warning label.
- A good choice for people, pets, and our planet.
- EPA Est. # 086143-MN-001

REASONS TO SWITCH TO THIS TECHNOLOGY:

Eliminates the need for chemicals

It cleans and sanitizes

Helps restore dirty tile and grout

Degreases kitchen surfaces and appliances

Makes windows and glass sparkle

Reaches hard to clean cracks & crevices

DESTROYS: Germs, viruses, molds, bacteria and dust mites

Helps to reduce asthma triggers

SAFE around children, pets and the elderly

NEVER emits volatile organic compounds into the air-EVER!

Dissolves tar & nicotine off windows & walls

Cleans and freshen carpets, upholstery, drapes and blinds
